IGI LABORATORY GROWN DIAMOND ID REPORT

06/19/2021 IGI Report Number LG480147428

PEAR BRILLIANT

7.83 X 5.24 X 3.47 MM

Carat Weight	0.90 CARA
Color Grade	6
Clarity Grade	SI
Polish	EXCELLEN'
Symmetry	VERY GOOD
Fluorescence	NONE
Inscription(s)	LABGROWN IG
	LG48014742
Comments: As C	Grown - No indication
of post-growth tr	reatment.
	Grown Diamond was
created by High	
	PHT) growth process.
Type II

Type II

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by International Gemological Institute (IGI). A LGD has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post growth modifications to change the color. IGI utilizes the most advanced techniques and equipment currently available including, binccular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FTIR, UV-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation nor appraisal and by making the report IGI does not garee to purchase or replace the article.
